About Internship

Web Development and Designing.

BASIC INFORMATION

RK Technologies is a community of diverse people coming together with similar objectives and ultimate goals.

RK Technologies is all about creating opportunities for leadership development, learning, student engagement, and fostering of shared interests. We develop enriching environments and experiences that promote students' knowledge and wellbeing.

ABOUT US

INSTRUCTIONS

- LinkedIn profile improvement (Mandatory)
- All the tasks are needed to complete for Internship Completion Certificate
- Maintain a separate GitHub repository(name as RKTECH for all the tasks and share the link of the GitHub repo in the task submission form(it will be given later through email).
- PEER EVALUATION watch and comment on at least two tasks videos on LinkedIn posted by fellow interns.

SUBMISSION

- A TASK SUBMISSION FORM will be shared later. Till then please continue your task
- A video need to be created to showcase your work, demo of your effort. The video should start with by your name on first page.
- The video can be hosted on LinkedIn for proof of your work and build credibility among your peers . You can tag RK Technologies in such posts.
- Please add #rktechnologies in each of your task video postings on LinkedIn, Additionally, you can also add hashtags such as #internship #webdevelopment, #datascience, #programming etc depending on your internship domain for more reach and visibility.

TASK LIST

For Web development and design internship you will need to complete any one (either Level 1 or Level 2 or Level 3) as per your convenience for successful completion of internship.

LEVEL 1

TASK 1

LANDING PAGE

A landing page is one of the best web development projects for beginners. This project demands a foundational understanding of HTML and CSS. You will learn how to add columns, divide sections, arrange items, add headers, footers. Most importantly, you will use your creativity to make the page look impressive. The alignments, the padding, the color palette, boxes and all the other elements on the page require attention. Use CSS carefully to make sure the elements on the page do not overlap.

LEVEL 1

TASK 2

PORTFOLIO

You can create a personal portfolio with the basic skills in CSS and HTML. This is yet again, one of the most common projects on web development for beginners. In a personal portfolio, you get to show a wide range of samples and skills and add your resume. You can add an image at the top where you can introduce yourself; below that, you can add contact information.

LEVEL 2

TASK 1

CALCULATOR

It takes a little skill to create a calculator with basic mathematical functionalities using CSS, HTML, and JavaScript. Calculators require an interactive interface to perform basic functions such as addition, subtraction, division, and multiplication. It will need a display screen to display the user's input and give the results. The grid system in CSS is for the alignments of buttons on the calculator. The additional tools you need to build a fully functional calculator include eventListeners, if-else statements, operators, loops, and so on.

LEVEL 2

TASK 2

A BASIC TO-DO WEBAPP

Develop a basic to-do app that enables a user to add daily tasks.

The to-do web app must allow users to add new items to a list, and items added to a list must be visible. Also, a user can mark a task “complete” upon its successful completion, and these completed tasks must appear on a separate list, say Completed Tasks.

You can also add a separate section titled Pending Tasks that will list all the tasks that require completion. In such a case, the to-do list will be a union of the Pending Tasks list and the Completed Tasks list. Irrespective of the list, a user must be able to delete or edit tasks from it.

To further increase the web app’s complexity or make it more detailed, you can add the date and time when a task is added and/or completed.

LEVEL 3

TASK

DYNAMIC WEBSITE OR APPLICATION

Dynamic websites and applications are platforms that utilize server-side processing to generate and deliver content in real-time, allowing for interactive and personalized user experiences. Unlike static websites, which present pre-designed content to all users, dynamic sites can adapt and change based on user input, preferences, and external data sources

For Example :

1. Netflix
2. Scratch
3. LinkedIn
4. Quora
5. Size

ASK US FOR HELP!

THE PURPOSE OF
THIS INTERNSHIP IS
TO LEARN AND GROW

PERSONAL DEVELOPMENT

THIS INTERNSHIP
WILL HELP YOU TO
ENHANCE YOUR
EMPLOYABILITY
PROSPECTS AND
RAISE YOUR
CONFIDENCE.

WE DON'T WANT TO
DICTATE YOU. IT IS UP
TO YOU TO SEEK
GUIDANCE.

THE TASKS GIVEN
MAY SEEM VERY EASY
OR VERY DIFFICULT.
WE EXPECT THAT
YOU GIVE
PROFESSIONAL DUE
REGARD TO THE
TASKS.
